Empowering Farmers, Enriching Lives

Namaste!

In response to the challenges faced by individual **Farmer Producer Organizations (FPOs)** in marketing their products, Agrinee Naturals was established in 2023 as a unified “Marketing Federation”. Agrinee has brought together **45 FPOs** and over **40,000 farmers** committed to sustainable, natural, and organic cultivation.

The name “Agrinee,” meaning “One who leads,” embodies the spirit of our organization, led by our true leaders—the tribal women farmers. These pioneers are not just cultivating crops; they are driving agricultural progress. From fresh produce to cereals, oilseeds, and millets, they are the torchbearers of a healthier, more sustainable future.

Through government-approved schemes, several of our FPOs have successfully set up primary and secondary processing units at the farm level. This has empowered our farmers to add value to their produce right at the source, ensuring that the benefits reach both the farmers and the consumers.

Agrinee has also partnered with **Nutrihub (TBISC)** and the **Indian Institute of Millet Research (IIMR)** to invest in state-of-the-art technologies that transform traditional millet grains into delicious snacks and wholesome meals. This collaboration allows us to honor our agricultural heritage while embracing modern advancements, catering to the growing demand for nutritious and sustainable food options.

YOUR SUPERFOOD- MILLETS

Prime Minister Shri Narendra Modi's vision of making India the 'Global Food Basket' reflects our goal to ensure that every dining table around the world features at least one product made in India. As part of this mission, Agrinee is committed to bringing the finest, most nutritious millet-based products to the global market, contributing to the nation's promise of health and sustainability.

Recognizing millets as key to tackling global food challenges and restoring traditional nutrition, he introduced the term "Sri Anna." "Sri" symbolizes divine grace, while "Anna" signifies a staple food grain, together representing the best of India's agricultural heritage.
